

Global Gear and Machining Environmental Policy:

Global Gear and Machining operates its business activities in such a manner that helps protect the environment by having an Environmental Management System conforming to ISO 14001, and:

- Sets and monitors annual environmental objectives aimed at minimizing the environmental impact of Global Gear and Machining activities, products and services;
- Employees of Global Gear and Machining are committed to the protection of the environment and prevention of pollution through involvement, education, training and emergency preparedness;
- Uses environmentally sound business practices that protect employees, suppliers, customers and nearby residents from exposure to hazardous materials or waste;
- Is committed to fulfill its statutory and regulatory compliance obligations;
- A commitment to continually improve its Environmental Management System over time to enhance environmental performance.
